

QuickBooks Online Integration

Overview

RedTeam for QuickBooks Online provides contractors with a robust project management software solution to effectively manage projects to help break down communication barriers with stakeholders. Customers can now leverage the combination of the industry-leading QuickBooks accounting system with the construction industry's most comprehensive project management software and cost control product.

QBO Integration Benefits

Paperless Routing and Approval of Vendor Invoices.

Invoices received from Vendors and Subcontractors are electronically routed to members of your company for approval.

Contract Compliance and Lien Waivers.

RedTeam facilitates tracking of insurance and lien waivers for your vendors and subcontractors.

Mobile App for Jobsite Photos, Team Contacts, Time and Expenses.

RedTeam app enables your employees to capture jobsite photos, access team contacts, and enter their time and expenses on the go.

How It Works

RedTeam connects to QuickBooks Online to provide a complete construction accounting platform for commercial construction contractors, including customer proposals, contracts, change orders (G701), schedules of value, AIA-style progress billing (G702/703), time and materials (T&M) billing, employee time and expenses, subcontracts, subcontract change orders, purchase orders, project budgets, job cost, estimated cost at complete, revenue recognition and work in progress (WIP) schedules.

“I like the reporting and the different authority levels. You can manage all your job costs in this software and it has great integration with QuickBooks Online. It is very easy to use and provides a lot of project management functionality.”
- KARINE W.
